

02/14/2019

To whom this may concern,

It is with great pleasure that I write this letter of recommendation for Daniel Michael Crane commonly known for his "Come Fly With DMC" solo acts for all occasions. Daniel has entertained audiences for the past five years throughout TN and the Carolinas. He is best known for his reputation as the human "Jukebox" singing a variety of styles to cater to each and every audience no matter their age group.

Sadly, many of our residents here at Sevierville Health & Rehabilitation Center due to age and infirmity are now unable to go out and enjoy the music and entertainment that they had enjoyed in previous years. It was very important to our organization and our administrative team to be able to bring the same form of class and entertainment to our residents that they had become accustomed to in previous years. We started searching for an entertainer and vocalist to come and perform for our residents and their families on Valentine's day and we were very grateful to come across Daniel Michael Crane. He arrived early for the occasion not only to set up and prepare his own equipment and do his sound checks, but he also assisted our own staff in preparing for the occasion.

His personal concern for the residents made it very clear early into our collaboration with him that he comes from a background in the healthcare field. Not only did he perform and give the residents an unforgettable show, but he was often found both before and after his performance showing personal interest by speaking with the residents and their families, even dedicating some of his songs to them. He also stole the heart of every woman in our audience as he proceeded to hand out his personal touch of roses for the occasion.

Some of the feedback we received from the residents and their families:

"We've never seen the residents smiling, dancing, and moving so much."

"I haven't heard mom sing in years, she knew the words to each one of his songs."

"A class act, with a bright future ahead of him."

One resident in particular was brought to tears on the occasion and commented:

"This is the best day of my life."

We at Sevierville Health & Rehabilitation Center highly recommend Daniel Michael Crane for the class, professionalism, and the personal touch he brings to each and every performance and we look forward to inviting him back and collaborating with him again in the very near future.

Sincerely,  
Sevierville Health and Rehabilitation Staff
